Journal of Microbiological Methods 31 (1998) 213–214

Journal of Microbiological Methods

Contents of Volume 31

Nos. 1–2, December 1997

Research papers

Direct enumeration of injured *Escherichia coli* cells harvested onto membrane filters
A.-S. Braux, J. Minet, Z. Tamanai-Shacoori, G. Riou and M. Cormier (France) 1

Statistical analysis of reduction in tensile strength of cotton strips as a measure of soil microbial activity
R.L. Correll, B.D. Harch, C.A. Kirkby, K. O'Brien and C.E. Pankhurst (Australia) 9

Rapid extraction of lipid biomarkers from pure culture and environmental samples using pressurized accelerated hot solvent extraction
S.J. Macnaughton, T.L. Jenkins, M.H. Wimpee, M.R. Cormiér and D.C. White (USA) 19

Differentiation between spore-forming and asporogenic bacteria using a PCR and Southern hybridization based method
J.A. Brill and J. Wiegel (USA) 29

Detection of virulence genes in uropathogenic *Escherichia coli* by polymerase chain reaction (PCR): comparison with results obtained using phenotypic methods
M. Blanco, J.E. Blanco, E. Rodríguez, I. Abalia, M.P. Alonso and J. Blanco (Spain) 37

Trichodiene as a volatile marker for trichothecenes biosynthesis
H. Jeleń, D. Latus-Ziętkiewicz, E. Wąsowicz and E. Kamiński (Poland) 45

Identification of *Bartonella* using PCR; genus- and species-specific primer sets
M.F. Minnick and K.D. Barbian (USA) 51

Quantitative detection of pentachlorophenol-degrading *Sphingomonas* sp. UG30 in soil by a most-probable-number/polymerase chain reaction protocol
K. Tin Leung, A. Watt, H. Lee and J.T. Trevors (Canada) 59

A physical model system in which to investigate the interactions of microorganisms isolated from the rhizosphere
D.A. Pearce, M.J. Bazin and J.M. Lynch (UK) 67

Immunomagnetic separation of *Listeria monocytogenes* for flow cytometric determination of viable cells in liquid
C. Nexmann Jacobsen, C. Fremming and M. Jakobsen (Denmark) 75

Development of a two-site enzyme-linked immunosorbent assay for quantification of the flagellar antigen in blackleg vaccines
M. Kijima-Tanaka, Y. Ogikubo, A. Kojima and Y. Tamura (Japan) 83

Novel use of *polA* bacteria for inserting DNA fragments into *Agrobacterium* binary vectors
J. Bobish and S. Leisner (USA) 89

Detection of clumping factor-positive *Staphylococcus lugdunensis* by Staphaurex Plus®
R. Zbinden, F. Müller, F. Brun and A. von Graevenitz (Switzerland) 95

No. 3, January 1998

Research papers

Direct fingerprinting of metabolically active bacteria in environmental samples by substrate specific radiolabelling and lipid analysis
P. Roslev, N. Iversen and K. Henriksen (Denmark) 99

Determination of the intracellular pH (pH_i) of growing cells of *Saccharomyces cerevisiae*: the effect of reduced-expression of the membrane H^+-ATPase
D. Bracey, C.D. Holyoak, G. Nebe-von Caron and P.J. Coote (UK) 113

Development of a rapid ribotyping method for *Corynebacterium diphtheriae* by using PCR single-strand conformation polymorphism: comparison with standard ribotyping
H. Nakao and T. Popovic (USA) 127

Terminal restriction fragment patterns (TRFPs), a rapid, PCR-based method for the comparison of complex bacterial communities
B.G. Clement, L.E. Kehl, K.L. DeBord and C.L. Kitts (USA) 135

Gas chromatography–mass spectrometry methods for the analysis of mycocerosic acids present in *Mycobacterium tuberculosis*
S. Alugupalli, M.K. Sikka, L. Larsson and D.C. White (USA, Sweden) 143

Optimization of membrane isolation and transferrin-binding proteins solubilization from *Neisseria meningitidis* cells
B. Echeverría, J.A. Gómez, E. Hernández, M.T. Criado and C. Ferreirós (Spain) 151

Miniaturized kinetic growth inhibition assays with *Vibrio fischeri* and *Pseudomonas putida* (application, validation and comparison)
R.P.H. Schmitz, A. Eisenträger and W. Dott (Germany) 159

Viability staining in a direct count rapid method for the determination of total viable counts on processed meats
G. Duffy and J.J. Sheridan (Ireland) 167

Characterization of chlorate-resistant sectors from isolates of *Fusarium moniliforme* and *F. proliferatum*
G. Vannacci and C. Cristani (Italy) 175

Gram characteristics determined on single cells and at the microcolony level of bacteria immobilized on polycarbonate membrane filters
S.J. Binnerup, O. Højberg and J. Sørensen (Denmark) 185

Preparation of DNA extracted from environmental water samples for PCR amplification
V.M. Boccuzzi, W.L. Straube, J. Ravel, R.R. Colwell and R.T. Hill (USA, Australia) 193

Short communications

Digoxigenin-labelled probe for the detection of enteropathogenic *Escherichia coli*
R.K.T. Kobayashi and M.C. Vidotto (Brazil) 201

Use of oxyrase enzyme (Oxyrase®) for the detection of bacteriophages of *Bacteroides fragilis* in aerobic incubating conditions
A. Puig, J. Jofre and R. Araujo (Spain) 205
